Profile Summary Entry-level Software Engineer with strong foundations in DSA and experienced with technologies like Spring Boot, Python, and MERN. Worked with REST APIs, Docker and Kubernetes.

Education B.Tech in Biosciences and Bioengineering | 2022-2026

Indian Institute of Technology, Roorkee

Experience

Software Engineer Intern | Investing Accelerator Summit | [Certificate](#) | January 2026 - February 2026

- Supported payment, refund, and subscription backend workflows and built frontend architecture using Next.js.
- Managed application data flow and persistence using databases, ensuring correct handling of transactional data.
- Monitored application logs, debugged production issues, and assisted in improving overall system stability.
- Collaborated with cross-functional teams to troubleshoot failures and support smooth application operations.

Software Developer | Suhane Safar | [Certificate](#) | [App Demo Video](#) | [GitHub](#) | March 2025 - May 2025

- Proposed and implemented Google Sheets workflow to efficiently manage and track end-user feedback and queries.
- Built a web app for internal testing to explore the Cashfree Payment Gateway for subscriptions/payments, Groq AI APIs for text, audio, and image analysis, and a fast frontend (Angular), evaluating their potential for future projects.
- Worked with Angular, React, Cloudinary (for image handling), JWT (for authentication), Groq AI APIs, and Cashfree APIs.

Biosciences and Bioengineering Department Library App development | IIT Roorkee

- A responsive and user-friendly MERN stack web app for the students and the librarian to easily manage book issue/return.

Projects

Software Engineering Job Simulation on Forage | SpringBoot | Kafka | JPMorgan Chase & Co | [Certificate](#)

- Integrated Kafka into a Spring Boot microservice to consume and deserialize high-volume transaction messages using a configurable topic and embedded Kafka test framework.
- Implemented transaction validation, entity modeling, persistence, and user balance updates using Spring Data JPA and H2. Integrated an external Incentive REST API with RestTemplate into transactional workflows.
- Exposed a Spring REST controller for querying user balances with JSON responses, and verified end-to-end behavior using Maven tests and debugger-driven inspection across messaging, database, and external API interactions.

Whiteboard | MERN | Kubernetes | Models and Robotics Section, IIT Roorkee | [Deployed Link](#) | [GitHub](#)

- Users can draw/edit/export boards and collaborate using room access controlled via keys and optional passwords.
- Deployed as a monolithic application and additionally implemented a containerized microservices setup locally using Kubernetes (Kind cluster) for architecture experimentation and scalability understanding.

Search Engine for Blogs and Articles | Python | Google Developer Student Club, IIT Roorkee | [GitHub](#)

- Executed web crawling using Scrapy (Python library), applied AI filtering with Gemma3:1b to store only relevant links in a MongoDB database, and indexed the data to BonsaiSearch using the OpenSearch Python client for fast search results.
- Developed a React frontend with a FastAPI backend to serve real-time search queries using the indexed data.

Social Media Website | MERN | ACM IIT Roorkee | [Demo Video](#) | [GitHub](#)

- Developed a full-stack social media app with authentication, posts, follows, likes/comments, and real-time chat using JWT, Cloudinary for media storage, and periodic polling for updates.

Skills

- **Languages:** Java, Python, C++, JavaScript

- **Frontend & Backend:** React, HTML, CSS, Angular, Spring Boot, FastAPI, Node.js

- **Databases & Tools:** MongoDB, MySQL, Git, Docker, Kubernetes (basic), Kind Cluster, Linux

- **Concepts:** Data Structures & Algorithms, REST APIs, OOPs

Extracurriculars and Certificates

- Web developer at Institute Innovation Council, IIT Roorkee.
- Certificate of excellence in Data Structures and Algorithms in C++ by Coding Ninjas | [Certificate](#)
